## Description

### Versa V Series Directional Control Valve

The VERSA 1" brass V Series valves are suited for nearly all pneumatic directional control applications. The V Series is designed for trouble-free

performance even in the harshest environments. The integrity of design makes them adaptable to a maximum number of applications with a minimum number of components. This is possible through the modular approach to valve construction, which allows valve bodies and actuating devices to be interchanged end for end and valve for a valve in many cases. The modular approach to this valve design makes thousands of valve variations possible, allowing the customer to "build" his valve to fit his unique specifications.

## Product Features

- Constructed of forged brass for long-lasting, corrosion-resistant strength. Functions without fail when exposed to mud, water, salt, grime, oils and chemicals
- FKM o-ring seals perform reliably with exposure to hydrocarbons or highly corrosive fluids over a broad temperature range: equivalent to Viton®, Fluorel®

## 100% Leak Tested • 10-Year Warranty

## Specifications

Actuation	Hand Lever-Offset   Spring Center
Function	4-way, 3-pos, Blocked Center
Port Size	Body Ported, 3/4" NPT
Valve Pressure Range (PSI)	VAC-200 psi
Valve Pressure Range (BAR)	VAC-13.8 bar
Primary Flow	9.7 Cv
Media	Air - Inert Gas, Natural Gas
Temperature Range (F)	5°F to 300°F
Temperature Range (C)	-15°C to 149°C
Body & Internal Parts	Brass
Weight	15.650000
